

SENIOR JAVA DEVELOPER

About us

Fighting financial crime (e.g., terrorism financing, money laundering, human trafficking...) is of paramount importance. International regulations require all financial service providers to implement financial crime compliance programs, and fines for breaches of compliance are extremely high.

Founded in 2017 by a team with 20 years of experience in Compliance technology, Neterium aims to help platforms, fintechs and financial institutions in detecting high-risk transactions, individuals or entities by offering a cloud-based screening service, available through a standard REST API.

Our ambition is to become a global leader in Financial Crime Compliance, offering advanced technology solutions to international clients and an attractive working environment for top talents.

The Role

- You will join the team leading the development of our technology solutions, and be supported by world-renowned experts in Financial Crime Compliance.
- You will be developing cloud-based, high-availability and scalable solutions, that will be installed in multiple public and private clouds.
- Together with our Dev Relations team, you will help our international clients integrate our solutions, capturing feedback to iteratively improve our products.
- The role is based in Louvain-La-Neuve (20km SE of Brussels) but can be partly remote.

Your skills

- Very good knowledge of JAVA (8+) development
- Micro-Services architectures
- Object Oriented, Synchronous and Asynchronous Communications
- Deep understanding of REST API
- Used to work with Maven, Docker and Git
- Knowledge of MongoDB is an asset
- Aware of SaaS (cloud) environments specificities - AWS and/or Azure
- Good English written and spoken
- Autonomous
- Able to operate inside a security-aware culture

What we offer

- The agile and fast-moving environment of an international startup
- The ability to meaningfully contribute to the global fight against financial crime
- Compelling salary package
